

I don't understand all the issues pertaining to LPFM stations and why they should take priority over FM translator stations, but I think you are making a huge INCORRECT assumption if you feel that there is little value in a national station like KLOVE. KLOVE is an incredible station that fills a service not filled by any other commercial radio stations I have found in my local community. KLOVE offers family-friendly non commercial positive uplifting songs and messages throughout the day that just are not offered on other radio stations. I have been a financial supporter of KLOVE for over 3 years because I believe in the station and their purpose. I would ask that you carefully consider any decisions that could negatively impact this station.
